

WattsHappening v2.2 – Release notes

Target Release date: 11/03/2024

Release notes date: 11/03/2024

Overview

Changes:

- Database in backend implemented. More reliable and traceable. Now possible to audit past simulation requests.
- Fully reviewed set of models behind all results (CRM, FCR, afrr, mfrr, Day-ahead, intraday and imbalance price). Documentation of all models corrected as a result and supported by examples. Restored simulation results for afrr and mfrr, that were hidden during the review due to required corrections.
- Newsletter sign-up form added to homepage
- Implemented NPS survey successfully with ~10 responses per month
- Implemented Bundled DLLs to tackle issue of page not loading
- SEO actions: sitemap uploaded to address website not indexing on Google search
