

WattsHappening v3.3– Release notes

Target Release date: 29/09/2025

Release notes date: 29/09/2025

Overview

Changes:

- Important Simulation update:
 - Historical reference period is now recent with simulations based on data from January 1st 2025 to July 31st 2025
 - Going forward this period will be updated regularly – you can check which reference period is current in three locations:
 - On the [homepage](#) in the disclaimer below the example asset market values
 - On the result screen of the [simulation](#)
 - In the [documentation page](#)
 - The algorithms and underlying data have been updated for all markets (CRM, FCR, aFRR, mFRR, DA, ID, Imb) – this is reflected in the [model documentation](#)
- Design and user experience improvements
 - – we adapted the branding of Watts.Happening to Watts.Happening by Elia to emphasise our credentials and ownership as a product of Elia
 - Thanks to feedback from our users, the navigation and layout of several pages has been adapted to improve clarity and ease of use
